MODELBOATBITS Was founded in 2009 and has built up a very good reputation for providing modellers all over the world a more personal service than that of a on-line shop

We are passionate about having that personal contact with our valued customers rather than just on line shopping

MODELBOATBITS have developed a range of quality products manufactured in-house at our workshop based right in the heart of beautiful Wales

More recently we have invested a lot in 3D printing and now have 5 printers creating new products that are continually being added to our product range

Also another addition to our manufacturing processes is Scale model flags, vinyl lettering and decals

We offer a standard range of products plus we also offer all of our product's to customer's own design's and requirement's Should you require a custom made component produced from Drawing's or Photographs then we are the people to come to

Our aim is to give great service and advice on all of your projects whether you are a fully experienced modeller or a complete novice just starting out

It will be a pleasure for us to contribute our services to your projects
